

Installing Microsoft Office from Office 365

When you login to Office 365, you should see the following landing page:

Just click the red “Install now” button and follow the prompts. For details see this [INSTALLATION VIDEO](#).

If you don’t see the landing page above, it could be because you haven’t used your account much yet and some parts still need to be “setup”. In that case you will likely see the following page:

Notice in the top right corner there is a “Notifications” icon . If you select this icon you’ll see a notification about getting Microsoft Office for free. Select “Install Now” and follow the prompts. This will initiate your account and then you can follow the steps outlined in Installation Video linked above.
